## COMMODITY CODE DIRECTORY

JANUARY 1999

# Introduction and Instructions

A Commodity Code Directory has been developed for use by vendors who wish to participate in bidding for the goods and services purchased by the New Jersey Highway Authority. Commodities have been organized into general groupings called “classes” which are designated by 3-digit codes. Each class is broken down into smaller detailed “subclasses” which are designated by 2-digit codes. The resultant 5-digit code comprised of both the class and subclass identifies the goods and services which can be used to select items to be procured and match them to those firms which wish to bid on them.

Firms interested in doing business with the Authority are required to complete a Bidder’s Mailing List Application selecting from this Directory those codes which correspond to the goods / services for which they would like to receive Bids and Requests for Proposal. The fact that a commodity or service is listed in the Directory does **NOT** mean that the Authority actually buys that item or service. The listing provides a mechanism to make interested sources of supply available to the purchasing staff.

The Directory has a table of contents to assist in locating the class in which the vendor is interested and a class / subclass listing. When in doubt list all related commodity codes on the Bidder’s Mailing List Application.
